

CALIBRATE

MIXER GRINDER

CATALOGUE

MIXER GRINDER

The wide range of Mixer Grinders from Calibrateindia works like a dream for both cooking experts and those who are new at it. Equipped with an advanced motor, that is powerful yet durable, they're great for everyday use and make great gifts as well.

Unmatched features

Energy efficient pure copper motor with higher RPM

Ultra-fast grinding performance

Vortex flow technology for fine grinding

Enhanced grinding performance at low voltage condition.

SS 304 graded blade with SAT

Inverter compatibility motor design

Efficient motor coiling concept

Integrated jar locking system

Overload protector to safe the motor

Higher thermal stability handling cabinet

Unbreakable PC lids with cap

Made up of anti-vibration used legs^

Easy to service

ENVY PLUS

Features

- 100% Copper powerful long-life motor.
- Food grade stainless steel multi-function jars with oil sintered copper bush.
- Unbreakable poly-carbonate jar covers.
- low noise operation.
- Overload protector
- Voltage - 220-240 VAC~50/60 Hz
- Power - 750 to 1000 Watts
- RPM - 18000-20000

NEXON

Features

- Energy efficient and high torque
100% copper motor
- Special grade SS multi-function jars
with oil sintered copper bush.
- Quadra flow cooling system
- Hardened food grade SS heavy blades.
- User friendly lid cap.
- Overload protector
- Voltage - 220-240 VAC~50/60 Hz
- Power - 550 to 750 Watts.
- RPM - 18000-20000

GLANZA

Features

- Energy efficient 100% copper motor
- Food grade SS jar with flow breakers
- Superior metallic coated designed
- Mini storage jar with grinding support design.
- Hands free grinding with easy lid lock**
- Overload protector
- Voltage - 220-240 VAC~50/60 Hz
- Power - 750 to 1000 Watts.
- RPM - 18000-20000

EAGLE

Features

- High glossy ABS body material.
- 100% Copper powerful long-life motor.
- Food grade stainless steel multi-function jars with oil sintered copper bush.
- Unbreakable poly-carbonate jar covers.
- Hardened food grade SS heavy blades.
- low noise operation.
- Overload protector
- Voltage - 220-240 VAC~50/60 Hz
- Power - 750 to 1000 Watts.
